

ENVIRONMENTALLY CONSCIOUS SMART LIGHTING

Invitation

**ECOSLIGHT at Light & Building Autumn Edition
Human Resources in Lighting**

ECOSLIGHT aims to the upskilling and the enhancement of employability of professionals and Higher Education students linked to lighting-related issues in the construction sector. For this purpose, it

- Designs new job profiles reflecting actual needs
- Designs and develops VET curricula based on the market competence needs, making a combination of lighting, green, digital, entrepreneurship and life competences
- Develops and makes available to the public a modular VET training program, including a MOOC and a specialization course (per profile)

A European-wide market analysis was conducted to identify the skills and competences required for professionals operating in the sector, as well as the training programs currently offered for them, mainly possessed in the EQF level 5. The results of this analysis are presented during this panel, followed by a discussion on key findings. The complete survey results may be found here: <https://www.ecoslight.eu/results/>

These presentations are organized under the Light & Building Autumn Edition, on October 2 – 6, 2022 (Frankfurt am Main, Germany). For in-person participation, please visit the exhibition webpage: <https://light-building.messefrankfurt.com/frankfurt/en.html#registration>. The presentations will be filmed and made available for further use on the Light + Building digital extension as video on demand.

Date:	06.10.2022
Time:	09:30 – 11:00
Location:	Messe Frankfurt, Ludwig-Erhard Anlage 1 Design Plaza Hall 3.1, Stand F21

Time	Topic
